Tom Kishchuk

Director, Max Power Minim Corp and Rivercity
Innovations Inc.

Tom started his career in the field of heavy industrial manufacturing for power generation equipment in 1989 at a then brand-new company, Hitachi Canadian Industries Ltd. Over the next 26 years he worked in many roles to

support the needs of a growing business and in 2006 was appointed the first Canadian President and CEO of the Canadian operations. During this period Tom contributed technical and business expertise to a broad range of projects utilizing fossil, nuclear and renewable forms of power generation.

Tom was appointed Vice-President Operational Support for Federated Cooperatives Limited (FCL) in 2015 where he led several teams that delivered goods and services to the Co-operative Retailing System in Western Canada. In 2020 Tom established TPK Management Consulting Inc., to support organizations in their innovation and growth journeys. Tom is currently serving as the founding Executive Director for the Global Institute for Energy, Minerals and Society.

Through his work Tom has had the opportunity to conduct business in many countries and cultures, primarily those in Asia, Europe and North America. He has extensive Board experience in the corporate, co-operative and not-for-profit sectors and is currently a Director of Max Power Mining Corp. and Rivercity Innovations Inc., and is Chair of the University of Saskatchewan, College of Engineering Dean's Advisory Board.

Tom has a BSc. and MSc. in Mechanical Engineering from the University of Saskatchewan and completed the Ivey Executive Program at the Richard Ivey School of Business.
