SEDV 623: STRATEGIC ENVIRONMENTAL PLANNING FOR ENERGY ORGANIZATIONS
Corporate strategic frameworks as applied to sustainable development concepts.

Instructor:
TBD

Course Objective:
The purpose of this course is to provide 1) an overview of the principles of corporate strategy in the context for making environmental decisions, and 2) an overview of various topics related to energy transition with particular focus on evolving electricity systems and the role of hydrocarbons in the global economy.

Learning Outcomes:
• Discuss key corporate strategic frameworks in various sustainable energy development business settings.
• Apply frameworks that inform strategic decision making.
• Understand various current issues in which environmental concerns impact business strategy, (regulations, community engagement, stakeholder management, leadership, etc.).
• Gain knowledge and understanding of a variety of policy topics related to energy transition with particular focus on electricity systems and role of hydrocarbons in the global economy.
